Product Overview

Digitally Printed Signs help your company make a lasting impression. We specialize in large-format digital printing for short run color signs and posters that can be produced quickly and cost-effectively. We now can produce full-color images with an outdoor durability of up to five years. Major corporations were the first to embrace this new technology as a way to separate themselves from the competition and send a strong message to the consumer. The technology has advanced to the point that it is now cost-effective for even the smallest of businesses.

Why Work With Us?

· Reliable, personal service and expert signage consultation

· Many signs can be produced in less than 48 hours.

· Our digital capabilities and e-media friendly certification ensure easy conversion of your files and precise accuracy in reproducing your artwork.

· Archival of logos and other artwork, allowing you the convenience of re-ordering by phone, fax or e-mail.

· A wide variety of high-quality sign materials in dozens of colors and finishes is available.

Applications

Fleet Graphics

A recent study showed that fleet graphics have a view rating three times higher than do billboards

Visual Merchandising

We can print posters, floor graphics, backlit displays, hanging cloth banners, and window graphics.

Posters

Can be laminated and mounted on foam board for a variety of different projects

Trade Show Graphics

Really stand out with high-resolution 600DPI inkjet prints that are laminated to diffuse the bright lights without ruining the integrity of the color.

Backlit Graphics

Brilliant looking displays are produced with heavier ink saturation so the colors will be vibrant when viewed in a backlit display
Floor Graphics

Graphics are laminated with a washable, scuff-resistant material that is very durable.

Vinyl Banners

These banners will stand up to the toughest weather conditions and can also be used indoors.

Window Graphics

Why not use the front window of your store to draw more attention?

General Specifications for Frames (continued)

Aluminum Frames with lenses

Matte clear acrylic based lenses are laser cut to snap in and out of anodized aluminum frames, round or square cornered. Lenses can be screen-printed, and have tactile or Braille mounted to them while exposing a paper graphic. Snap lenses are designed for custom size aluminum frames in sizes from 6 to 200 square inches.

- Frames have 1/8" wall thickness, ½" outside depth with a 1/8" masonite backer.

- Lenses snap in and out with the aid of a suction cup placed in the center of the lens.

- Dividers are used to make multi-lens compartments.

- Special matte black dividers can be used to make compartments under a single lens.

- Frames can be made to accommodate paper and 1/32", 1/16" or 1/8" sign material.

- Eight rich anodized colors are available in all four styles: Polished Silver, Satin Silver, Polished Yellow Gold, Satin Yellow Gold, Polished Rose Gold, Arch Bronze, and Matte Black.

Decorative Bars

Three sizes of decorative bars create bold metallic borders for your signs. Formats of top and bottom or left side, right side are available. One can use equal size bars or mix two different sizes. All three sizes can be made into a complete four-sided frame, and all formats can accommodate a snap-in matte clear lens.

- Bars are available in five anodized finishes: Polished Yellow Gold, Polished Rose Gold, Matte Black, Polished Silver, and Satin Silver. All parts are anodized individually to give finished ends.

Architectural Plastic Frames and Plates

The 7000 series round corner and 8000 series square corner molded plastic frames are designed for quality interior signage. Each frame is molded in one of 6 matte colors: Gray Almond, White, Brown, Arch Brown and Black. All frames have a ½" outside depth, 1/8" thick walls, and mounting holes for attaching to walls. The size of each frame is listed as an inside dimension and the inside radius on the round corner frames is 5/16". Each Frame is designed to accommodate all sign material from 1/16" to 1/8" thick, or it's own plastic injected molded plate.

Designer Plastic Frame System

Designer is a round corner plastic molded sign system with features created to solve your many sign requirements. It is available in 10 different sizes all with round corners and 6 matte colors: Pewter gray, Medium Gray, Back, White, Almond and Brown.

Designer 2 is a handsome sign system with ¼" walls, clean square corners, and many features to solve the most difficult sign requirements. Designer 2 is molded in 10 sizes and 6 matte plastic colors: Pewter gray, Medium Gray, Back, White, Almond and Brown.

Eternity

Over thirty ready-to-use aluminum signs for indoor and outdoor use that can be customized to suite your needs. The Eternity system is easily adaptable and is modular, with a clip on system that can be arranged in both vertical and horizontal formats.

Modular Frame System

Designed for interior signage. Frame construction provides flexibility for installations and sign inserts. Signs change over easily. Sign inserts fit securely into frames with a snap lock mechanism. Frames and inserts are tamper-resistant.

Slatz Sign Systems

Our exclusive Engravers Sign System combines silver and gold aluminum shapes and injection-molded plastics into a unique system of interchangeable components for single signs and directories. Some assembly required. We simply engrave the inserts, snap into place, and your interior sign system is ready for installation.
